

# Boxgirls International

## Girls in the Lead - We Learn, We Act, We Share

Girls in the Lead is a Leadership programme for women\* in sport and development.

Many development organisations in the field of girls\* and women\* empowerment in sports have developed high-quality, valuable program ideas and implement them effectively on a local level.

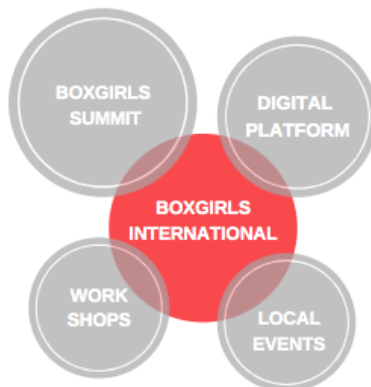

Do you belong to one of these organizations?

We want to further develop the expertise and experience of your organisation together, and promote and support it. For this purpose Boxgirls International brings together women's sports organisations from all over the world. The aim of the network is to promote the exchange of organisations by and for women\* and girls\* in the field of sport and development worldwide and to promote the organisations in following three areas in the long term:

To achieve this goal, Boxgirls International provides a diverse and interactive learning platform. In addition to a variety of permanently available resources, Boxgirls International offers

International workshops in various countries, which are adapted in advance to the needs of the organisations and reflected in subsequent online coaching.

Together with our 6 core partner organisations in 6 different countries we develop sustainable Best Practice Concepts that support the work of all member organizations sustainably and thus strengthen social change and to promote gender equality.

You want to improve your skills in three areas  
and would like individual advice?  
Do you want to get to know best practice concepts?  
and exchange ideas with other organizations?  
You want to scale your own experiences and  
develop new products together with other organisations?
